

School-Within-School at Logan Annex

School-Within-School is a public, teacher-directed, Reggio Emilia inspired early childhood learning environment. Formerly housed within the Peabody Elementary School on Capitol Hill, this Pre-K and Kindergarten program was expanded upwards to first grade for the 2012-13 school year. In order to accomplish this expansion, and planned future growth, a new home had to be found.

Expansion space was reclaimed from a DCPS professional development suite, housed at the Logan Annex. In the summer of 2012, this utilitarian building was re-purposed as a vibrant and cheerful home for the new SWS at Logan Annex. Bright colors and open spaces welcome students, staff and visitors and provide the backdrop for SWS' arts-based curriculum.

Project Data

Project Type: Adaptive reuse

Size: 7,800 sf

Construction cost: \$630,000

Completed: August 2012

Client: District of Columbia Public Schools / DGS

General Contractor: Broughton Construction
